Fees may be reviewed from time to time by ISCA and published on [www.isca.org.au](http://www.isca.org.au). Fees are in Australian dollars and are exclusive of GST. Significant discounts are provided to ISCA members in recognition of their ongoing support and commitment to ISCA, IS and infrastructure sustainability. Discounts are also provided for an "IS As Built" rating following an "IS Design" rating recognising that the project is already registered and there are efficiencies in conducting a second verification on the same project. Rating fees have been calculated based on project CAPEX. Fees range between 0.2% for small projects to 0.01% for projects >\$1b.
