

## ***Enabling Sustainable Procurement for Projects and Organisations (ESPPO)***

Sustainable procurement is an integral part of delivering sustainable business practices within projects and organisations, driving better outcomes through reducing risk, adding value and encouraging innovation. Done well, sustainable procurement adds positive environmental, social and economic impacts throughout the whole lifecycle of an asset, goods and services, and encourages cooperation, buy-in and better communication between purchasers, suppliers and stakeholders.

ISCA has developed a virtual training course that enables participants to understand how they can implement a more sustainable approach to procurement aligned to the IS Rating criteria, with the aim of creating procurement outcomes that reduce negative externalities while supporting contractual requirements, financial targets and risk management.

This course equips participants with tools and skills to enable sustainable procurement in their workplace, with a focus on implementing the procurement criteria in the IS Rating tool.

This virtual training is targeted at Sustainability Managers, Project Managers, Procurement Managers, and Sustainability Consultant.

This course is delivered in two half-day virtual sessions (8 hours = 2 x 4-hour involving virtual instructor led training (vILT)).

### **Course Aim**

By the end of this course, participants should be able to use principles and tools to enable a more sustainable approach to procurement.

### **Benefit**

This virtual instructor lead training (vILT) course will assist participants to enhance procurement practices in their project or organisation in relation to sustainability. A mixture of online instructional sessions and supporting activities will help participants reinforce and apply learnings.

### **Course Session Content**

- 1. What is sustainable procurement and why does it matter?
- 2. Risk and opportunity assessment and procurement strategy
- 3. Supplier assessment and selection
- 4. Contract and supplier management

### **Learning Objectives**

- 1. Identify and implement sustainable procurement opportunities in your organisation or project
- 2. Develop a tailored procurement strategy
- 3. Assess and select sustainable suppliers, goods and services
- 4. Manage suppliers to ensure compliance with sustainability requirements

### **Requirements**

- • Access to internet to access and download course materials
- • Video display device with internet access to participate in sessions
